

THE PROBLEM WITH DNA TESTING FOR ANCESTRY

- 1 generation back = 1 ancestor ignored
- 2 generations back = 4 ancestors ignored
- 3 generations back = 11 ancestors ignored
- 4 generations back = 26 ancestors ignored
- 5 generations back = 57 ancestors ignored
- 6 generations back = 120 ancestors ignored

The farther back you go, the more ancestors are eliminated from consideration.

All 126 ancestors contributed DNA
